7. DNS Vizualization Tool (Casey Deccio, Sandia Nat'l labs, 15')

8. AOB

Rechartering of WG

Ian & Henk

Rechartering of working group

Current charter is at least 8 years old

Charter does not reflect what we have been discussing for the past years

Only TTM is mentioned, other RIPE NCC IS services don't have a natural place

Other measurement activities "through the backdoor"

Time to revisit

New Charter

The purpose of the working group is to provide a forum in which the RIPE NCC and the community can collaborate in the areas of data, tools and analysis relating to the Internet and its infrastructure, with a loose focus on monitoring, diagnosis, analysis and forecasting. It is not the purpose of the working group to compare the performance of networks for marketing purposes.

And with that: a new name

MAT-**WG**

Measurement, **A**nalysis, **T**ools **WG**

Procedure

Draft charter posted to the list: November 24, 2009

Call for comments

None received

APPROVE new charter today

Present in Plenary on Friday

Implement

Web page, mailing list, etc.

Chairs

Henk

Has done this for 12.5 years by RIPE61, time to hand over

We need a new chair

Two volunteers so far. Any more?

Not too much work and highly appreciated by the community

Involvement in the RIPE PDP

You even get a free lunch
