

2009-01

The Wrap-Up
(hopefully)

Policy Outline (1)

- Phase 1
 - Central IANA Pool established
 - Certain classes of recovered Ipv4 addresses mandated to be returned to IANA
 - 6 monthly basis
 - Aggregated to /24 blocks

Policy Outline (2)

- Phase 2 (IANA main pool exhausted)
 - RIRs may apply at 6 monthly intervals for Ipv4 space from IANA recovered pool

Global Status

- LACNIC - adopted
- APNIC - adopted
- AFRINIC - adopted
- ARIN - adopted (but modified text)
- RIPE - sitting on fence

Further to ARIN

- Regarded as two polices
 - Establishment of central IANA recovered pool (global)
 - Return of recovered space (regional)
- However, negative connotations (probably unjustified)

Options

- Adopt with original wording
- Adopt with ARIN wording
- Adopt with our own wording
- Reject

Mailing list

- Considerable discussion
- Consensus to adopt policy with original wording

Futures

- Global policy so needs a globally acceptable form of words
 - ARIN modification probably outside this form of words
 - Either ARIN changes or the rest of the world does
- Split policy global/regional and start again
 - Need to move very quickly
 - Or switch off ventilator and let Ipv4 die?

RIP
