Industry – LEA cooperation
a short story

Wout de Natris
London Action Plan
RIPE 60,
Prague - 6 May 2010
About LAP (and OPTA)
Public – private cooperation
Members in 24 countries
New strategy, e.g.:
1. Intensify relations with industry
2. Work on relations with LEA
3. Develop best practices
OPTA: spam and spyware enforcement
Two dozen fines up to €1.1 million
It’s a story about:
LEA – industry cooperation

What went on before
Once there were ..........
This is a story about….

Cooperation
Based on trust
Common goals
Shared solutions
Cross border obstacles
All sorts of barriers
Making the internet safer for the enduser
Where are we?
OECD recommendations

1. There is no silver bullet
2. All parties involved have an important role to play
3. Governments: anti-spam law, raise awareness
4. Enforcers: toolkit, means, priorities, enforce
5. Industry: take measures, develop and adopt best practices
Where are we? (2)
The threats have changed since 2006
Fines? Jailtime? Disruption?
Individually we can’t make the difference
Genuine across the board cooperation is in its infancy
Q: Have we found each other?
A: Yes, well, most likely, but trying
Q: Where to start?
Cybercrime Working Party
Suggestion to start a working party
Focus on work
Let’s look at incentives
Incentives
Industry does not profit from black hats
Cooperation leads to LEA integration in policy development process
Society at large is threatened
Criminals need to be stopped/caught
Cybercrime Working Party (2)

Additional benefits:

A. LEA’s meet constructively also
B. Trickle down at national level
C. A better understanding of each others position
D. Understanding leads to common efforts
E. Cost reductions?
F. Better use of Internet Resources & bandwidth?
Goal
Make the Internet safer, but how?
1. Work together
2. Build trust
3. Find common topics
4. Identify approaches
5. Create solutions
6. Share information
7. Teach each other
Topics

Four topics are identified as a good start

1. Contact list
2. Technical training for LEA digital investigators
3. Template for information requests
4. Inventory of perceived problems and identify solutions
Identified issues
London 17 March 2010, LEA – RIR meeting

1. Hijacking IPv4 ranges
2. Enormous blocks of IPv6 ranges
3. Anonymity on the internet
4. Terms of contract
5. Resource revocation
6. Other RIRs are looking into these topics
7. Investigative material available at RIPE NCC
The end and happily ever after?
No, it’s a story with an open ending
All these topics are meant to build trust and to develop a working relationship
Who is on board?
Who wants to be on board?
We are going to write the rest of the story…

… together
The start

Do you agree with the identified topics?
Would you want to see other topics?

We will keep you informed on the WG list

Thank you
